# STI National Strategic Plan

- Five-year plan (2021-2025) with annual targets through 2030
- Developed by a Federal Steering Committee (including IHS representation)
- Covers: chlamydia, gonorrhea, syphilis, congenital syphilis and HPV
- Specific indicator on reducing congenital syphilis among AI/AN
- Implementation Plan under review by HHS

# New IHS NPTC Formulary Briefs Expand Access to Available STI Therapeutics

---

- IHS National Pharmacy & Therapeutics Committee (NPTC) Formulary Briefs offer a summary of recent clinical reviews for a clinical audience and also advise federal direct care (and participating tribal) sites regarding relevant additions to the IHS National Core Formulary (NCF).
- These new additions to the formulary ensure access to important therapeutics for STIs in Indian Country.
