

Harm Reduction: what it is, what it isn't, why it matters

Jessica Rienstra, PMHNP

ECHO Case Manager

Northwest Portland Area Indian Health Board

Slides adapted from Jessica Gregg MD PhD

Chief Medical Officer, De Paul Treatment Centers

Objectives

- Review **what** harm reduction is (and what it isn't)
- Discuss examples of **why** harm reduction matters & **how** it has been applied
- Consider the application of harm reduction in different settings
- Discussion

Something all of us do,
every day

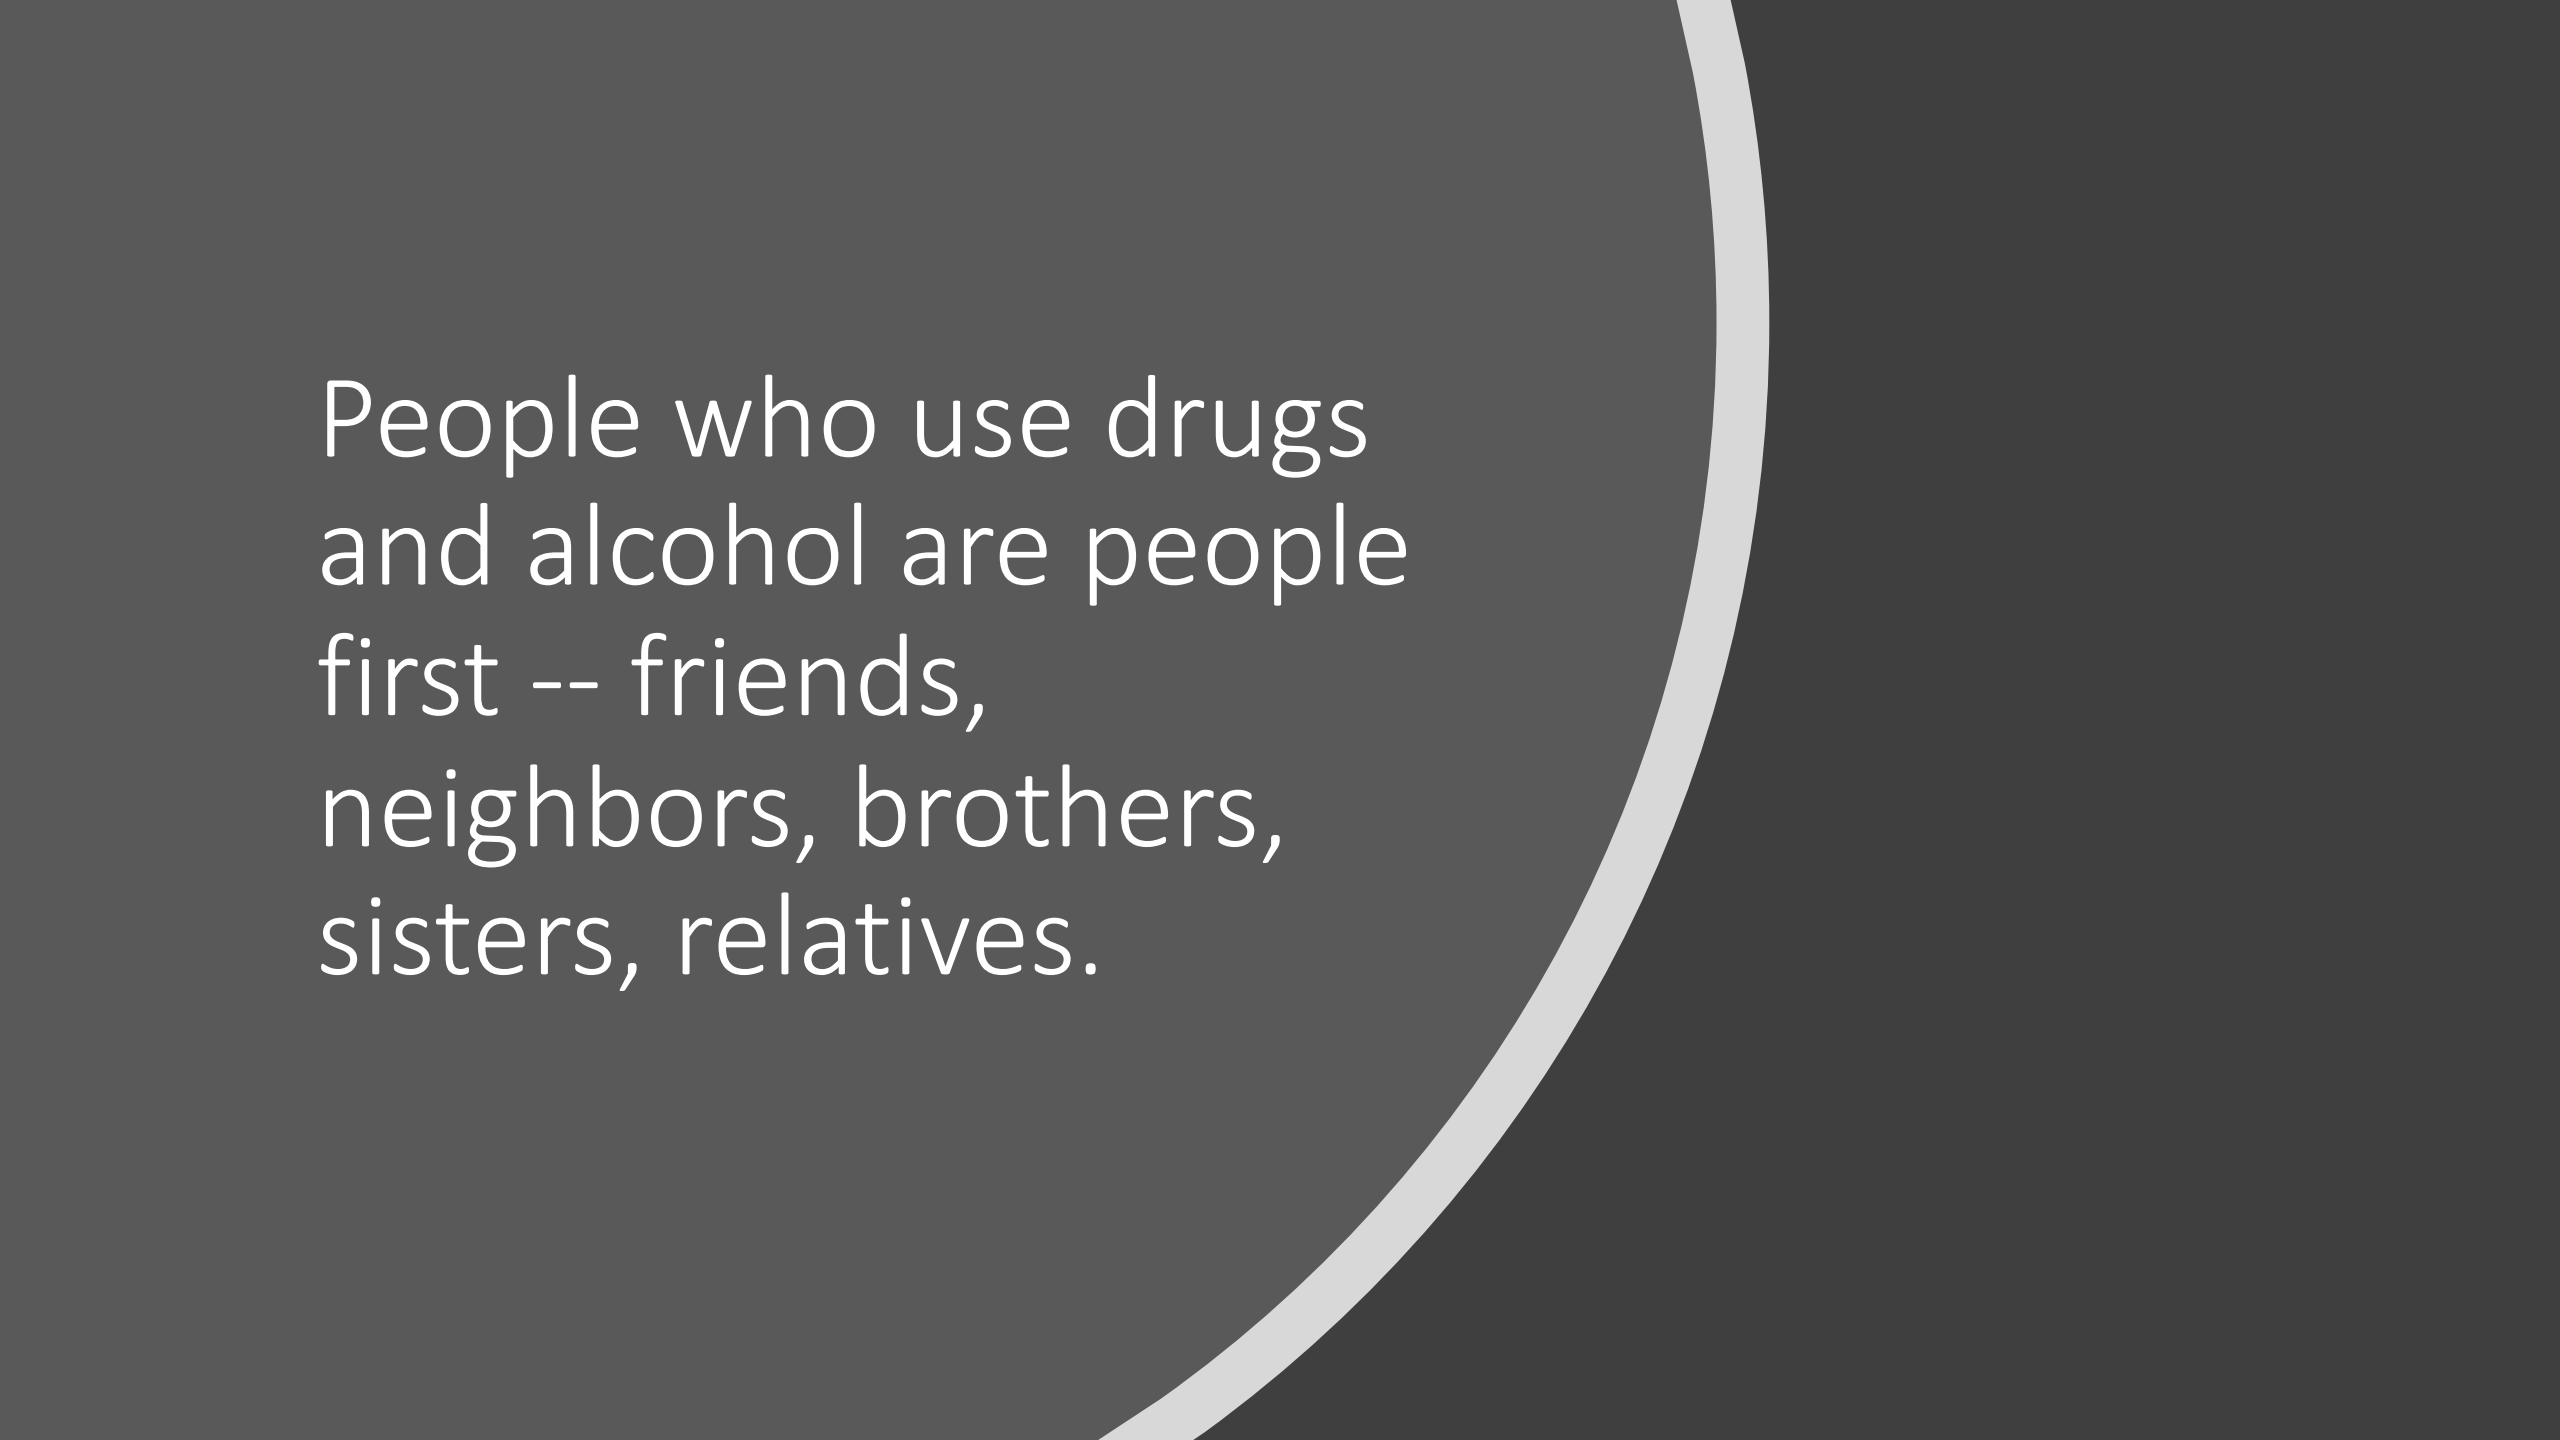

So, what is harm
reduction as it is applied
to substance use
disorders?

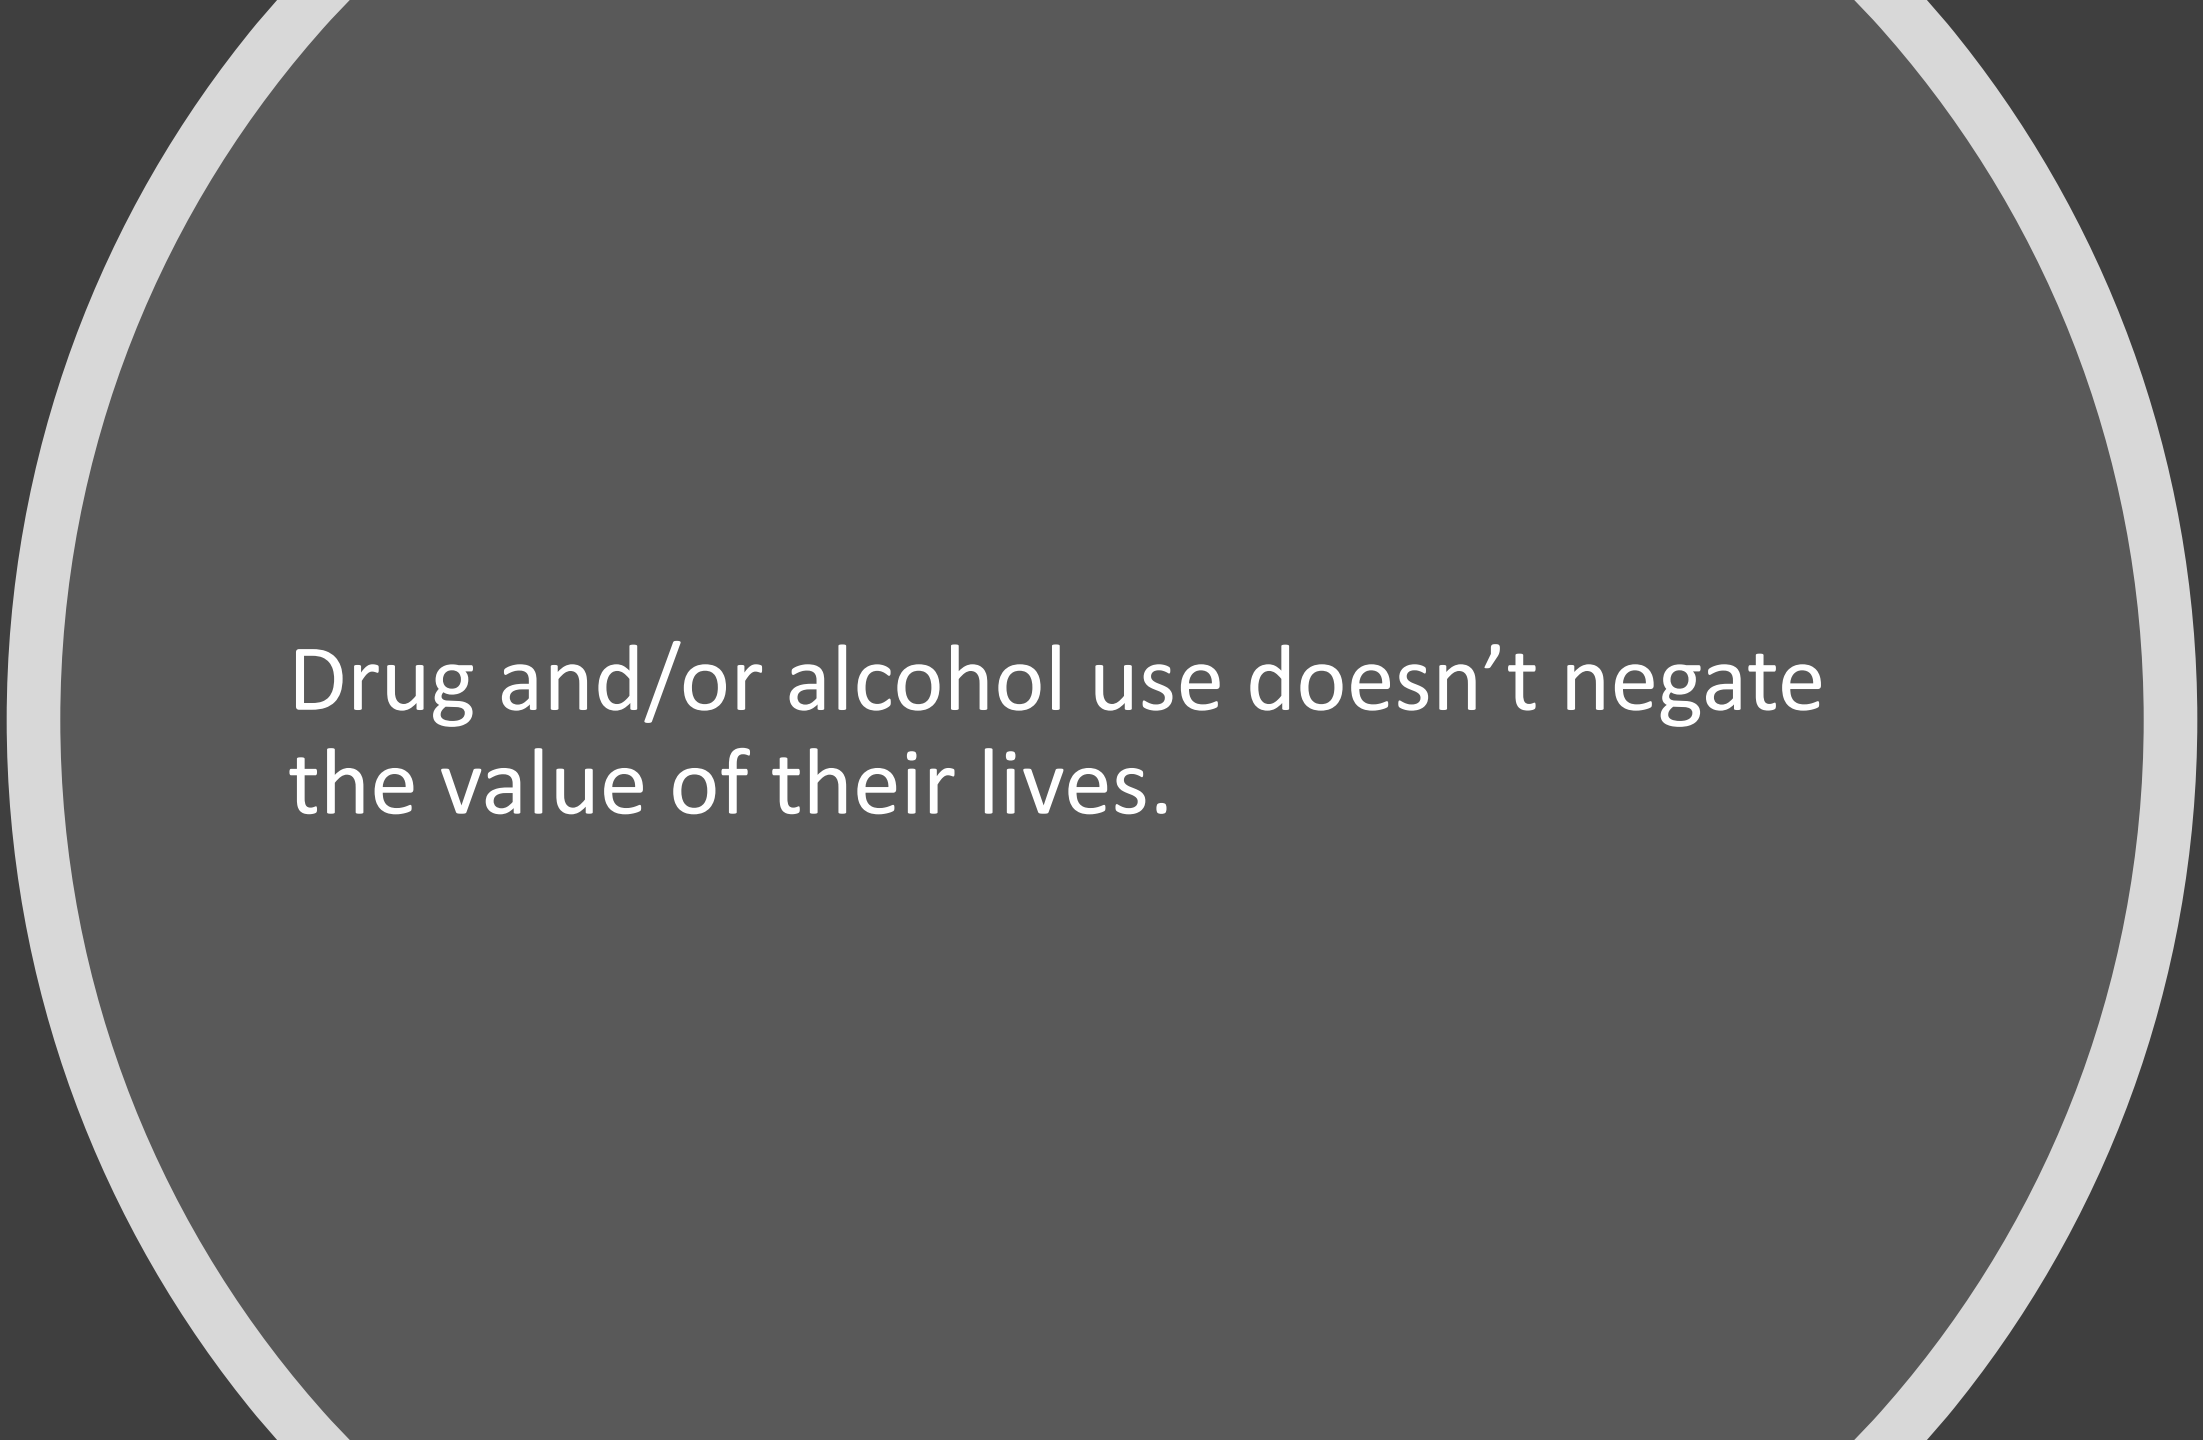

Harm reduction is a set of practical strategies and ideas aimed at reducing negative consequences associated with drug use. Harm reduction is also a movement for social justice built on a **belief in, and respect for, the rights of people who use drugs (and alcohol).**

<https://harmreduction.org/about-us/principles-of-harm-reduction/>

“a belief in, and respect for, the rights of people who use drugs (and alcohol).”

People who use drugs
and alcohol are people
first -- friends,
neighbors, brothers,
sisters, relatives.

Drug and/or alcohol use doesn't negate
the value of their lives.

First, and foremost: keep them safe, keep them alive, let them know they are loved.

Harm
reduction is
NOT

- Encouragement to use drugs or alcohol
- Incompatible with other substance use disorder treatment
- Giving up

All of this is Harm Reduction

DEATH PREVENTION

- Naloxone
- Fentanyl Test Strips
- Safer consumption services

DISEASE PREVENTION

- Needle exchange programs
- Safer sex materials
- HIV/HEP C testing & treatment

HEALTHCARE

- Emergency housing
- ER after OD
- Connecting with local resources

TREATMENT

- Medication assisted treatment (MAT)
- Counseling through Telehealth
- Case management

Excerpt
from the
Native
Harm
Reduction
Toolkit

Objectives

- Review **what** harm reduction is (and what it isn't)
- Discuss examples of **why** harm reduction matters & **how** it has been applied
- Consider the application of harm reduction in different settings
- Question, Answer, Discussion

EXAMPLE 1: Syringe Service Programs

WHY?

Escalating rates of addiction are fueling a dramatic increase in infectious diseases associated with injection drug use.

Figure 1. Six Moments of Infection Prevention in Injection Drug Use Model. Abbreviations: HAV, hepatitis A virus; HBV, hepatitis B virus; HCV, hepatitis C virus; HIV, human immunodeficiency virus; MRSA, methicillin-resistant *Staphylococcus aureus*.

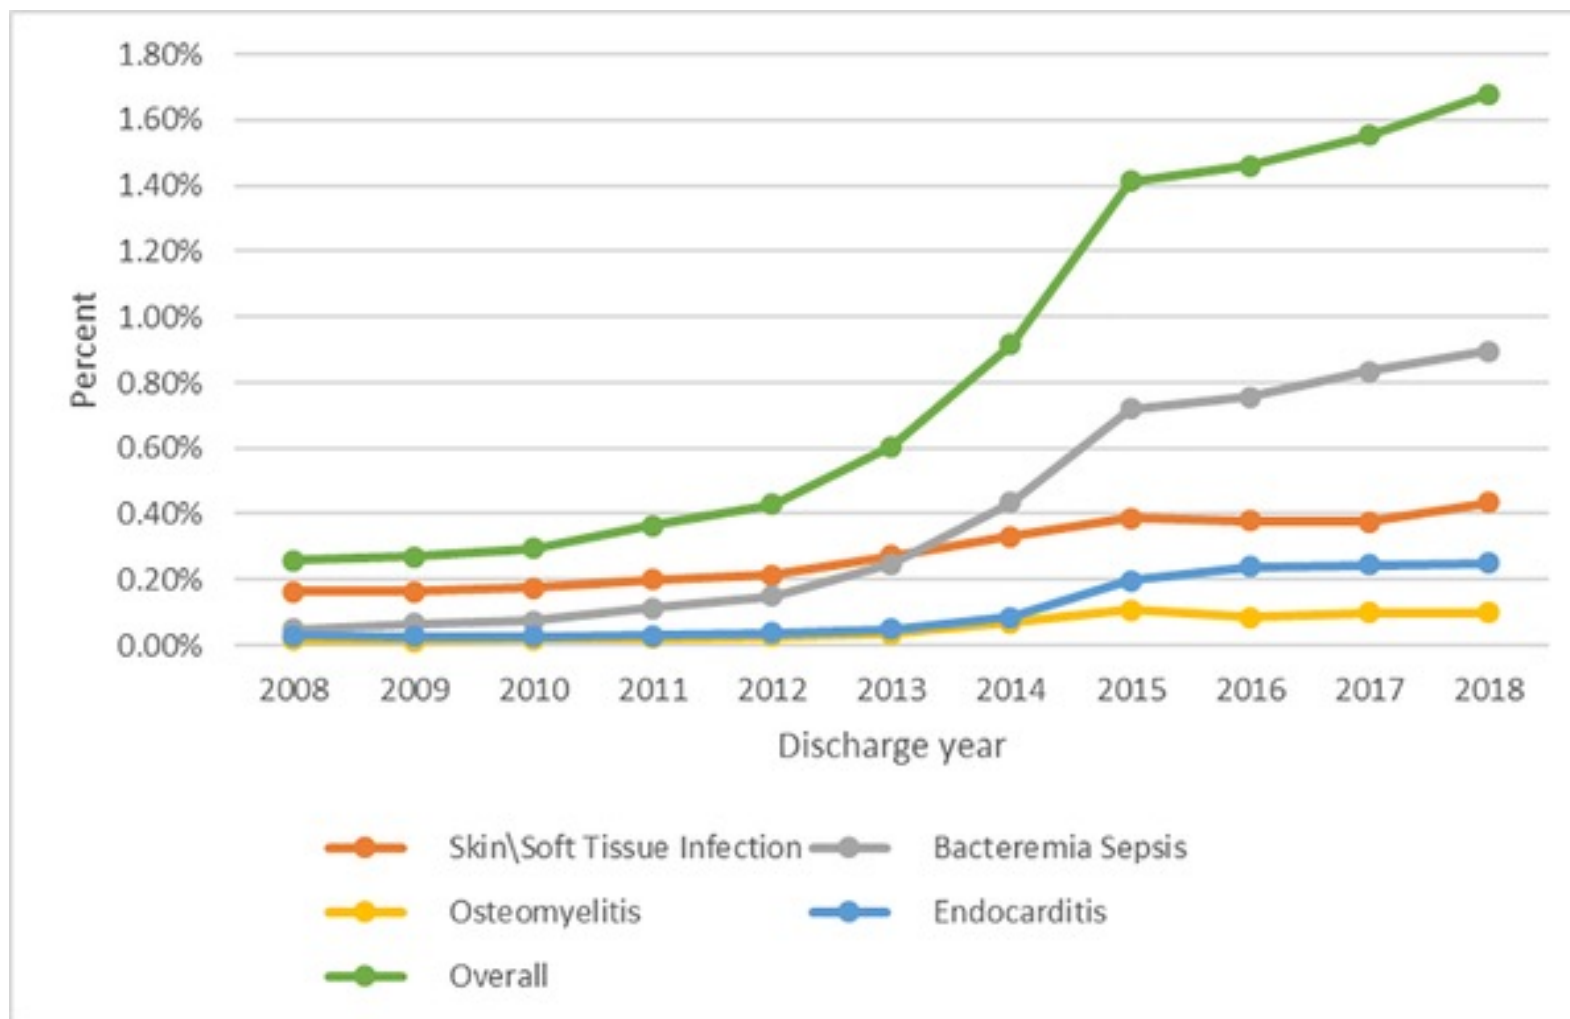

Reports of acute hepatitis C virus (HCV) infection rose 3.5-fold from 2010 to 2016, and **the majority of new HCV infections are due to injection drug use.**

Over 2,500 new HIV infections occur each year among people who inject drugs (PWID).

Fig 1. Injection drug use-related SBI hospitalizations, overall and by SBI type, as a percentage of all hospitalizations, Hospital Discharge Data, Oregon, 2008–2018.

Capizzi J, Leahy J, Wheelock H, Garcia J, Strnad L, et al. (2020) Population-based trends in hospitalizations due to injection drug use-related serious bacterial infections, Oregon, 2008 to 2018. PLOS ONE 15(11): e0242165. <https://doi.org/10.1371/journal.pone.0242165>
<https://journals.plos.org/plosone/article?id=10.1371/journal.pone.0242165>

There were 81,000 drug overdose deaths in the 12 months ending May 2020, the highest number ever recorded in a 12-month period

- Largely driven by increased fentanyl in drug supply
- Likely exacerbated by isolation and fear during COVID pandemic

If people can't get to a needle exchange, they can sometimes find the equipment at a pharmacy. Or, if in prison, cleaning the equipment with bleach can stop some skin infections, but reusing equipment that someone else has already used can transmit Hep C, even if the equipment is cleaned. Using sterile unused equipment for every injection is the safer option.

A life-saving
intervention

SSPs are associated with a **50% reduction in HIV and HCV incidence.**

When combined with medications that treat opioid dependence, HCV and HIV transmission is reduced by over two-thirds.

Centers for Disease Control and Prevention. Estimated HIV incidence and prevalence in the United States, 2010–2015. [HIV Surveillance Supplemental Report. 2018;23\(No. 1\) pdf icon\[PDF – 2 MB, 77 pages\]](#)

Platt L, Minozzi S, Reed J, et al. Needle syringe programmes and opioid substitution therapy for preventing hepatitis C transmission in people who inject drugs. *Cochrane Database Syst Rev.* 2017;9:CD012021. doi:10.1002/14651858.CD012021.pub2.

Fernandes RM, Cary M, Duarte G, et al. Effectiveness of needle and syringe programmes in people who inject drugs – An overview of systematic reviews. *BMC Public*

AND...

New users of SSPs are **five times** more likely to enter drug treatment and **three times** more likely to stop using drugs than those who don't use the programs.

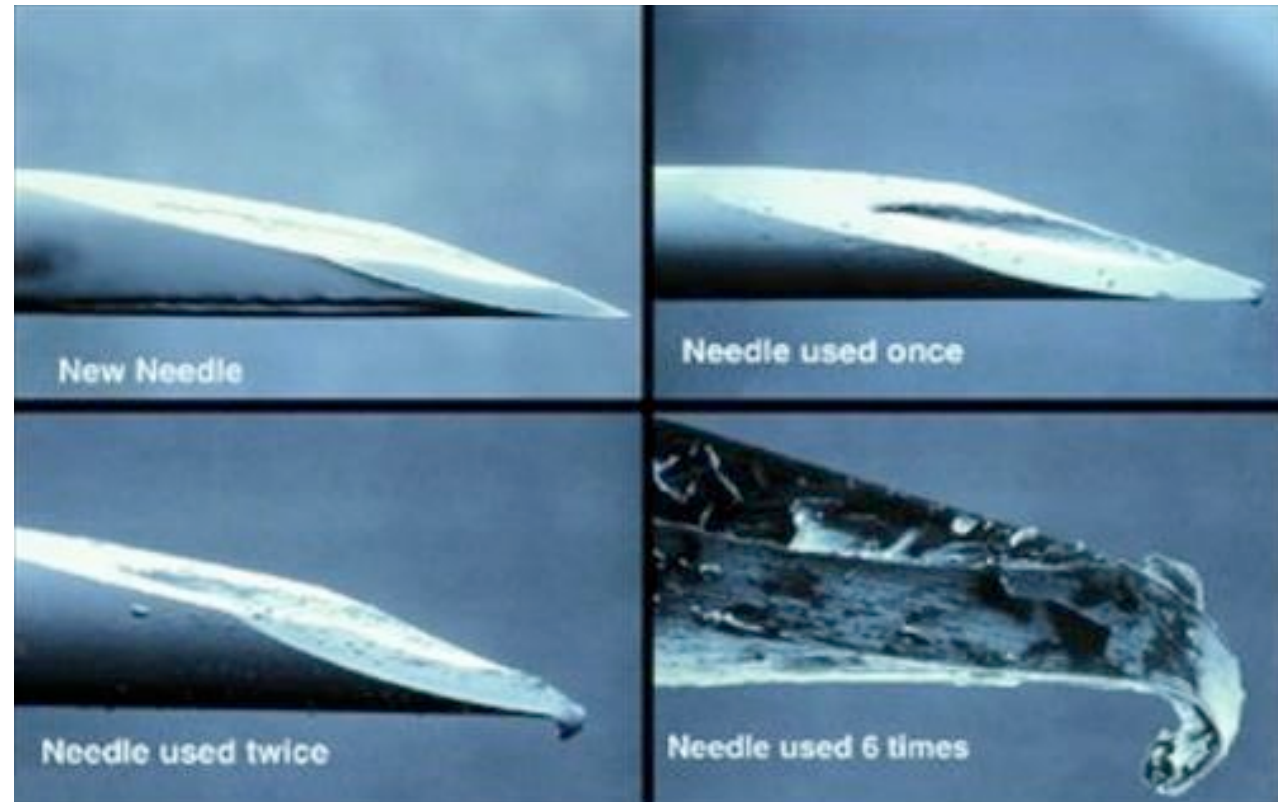

<https://www.cdc.gov/ssp/syringe-services-programs-factsheet.html>

Fernandes RM, Cary M, Duarte G, et al. Effectiveness of needle and syringe programmes in people who inject drugs – An overview of systematic reviews. BMC Public Health. 2017;17(1):309. doi:10.1186/s12889-017-4210-2.

HOW?

Sufficient supply of needles means less need to share.

New needles decrease infection in other ways as well.

<https://www.cdc.gov/ssp/syringe-services-programs-factsheet.html>

Harm Reduction is Cost Effective

Every dollar invested in
SSPs results in
\$7 in savings
just by preventing new HIV
infections.¹

SSPs provide naloxone directly to individuals who use drugs.

This matters because persons who use drugs perform the majority – over 80% -- of reported overdose reversals.

Siletz Harm Reduction Program: Lending a Hand to Community Members Others Struggle to Reach

Francisca "Sissy" Rilatos and a colleague at a syringe exchange booth in the community.

In 2018, the Siletz Community Health Clinic was awarded an **HIV Early Intervention Services and Outreach** grant from the Oregon Health Authority. With this funding, the Siletz Harm Reduction Program is able to offer syringe exchange, distribute naloxone nasal spray (used to reverse an opioid overdose), provide rapid HIV and hepatitis C testing, and connect clients to needed medical and social services.

THANK YOU FOR KEEPING THIS COMMUNITY SAFE!

IF FULL OR DAMAGED PLEASE CALL - LTNC @ 360-384-0464

CALL 911 then GIVE NARCAN (see box for complete instructions)

When the Person is Safe and Wants Outreach

To Request Outreach:

1. Call LVOC hotline, you may remain anonymous.
2. Give the name, phone number, & best place to meet the person wanting outreach.
3. A Lummi Behavioral Health counselor will provide outreach within 24 hours. The counselor can help connect the individual with services and support.

 #ENDSTIGMA

OPIOID ADDICTION IS A DISEASE

Opioid addiction, also called opioid use disorder, is a serious medical condition. It is a chronic, relapsing brain disease with symptoms that include compulsive seeking and use of the drug, despite harmful consequences.

It is considered a brain disease because drugs change the brain; they change its structure and how it works. These brain changes can be long lasting and can lead to many harmful, often self-destructive, behaviors.

Opioid addiction, like other medical conditions, can be treated.

STOP THE STIGMA

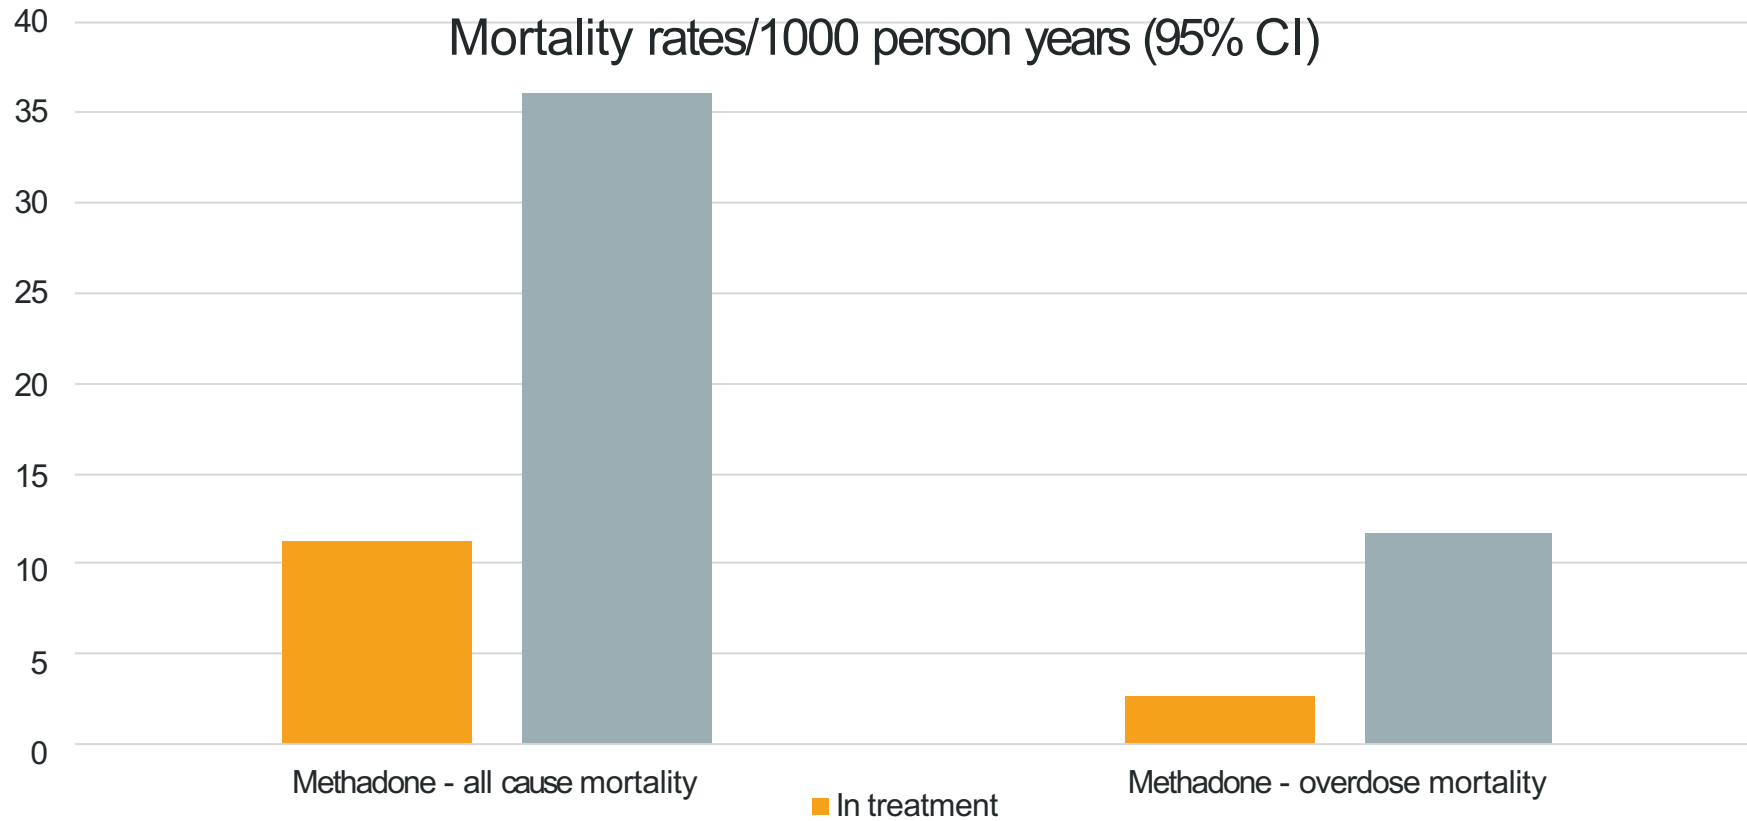

Example 2: Medication to Treat Opioid Use Disorder

WHY?

MORTALITY RISK DURING AND AFTER METHADONE TREATMENT

Mortality Risk during and after opioid substitution treatment: systematic review and meta-analysis of cohort studies. Sordo, et al. *BMJ* 2017.

HOW?

Update - March 22, 2021 | First Tribally owned Medication-Assisted Treatment Clinic opens | Great Circle Recovery

Great Circle Recovery, which is located near downtown Salem, is Oregon's first tribally-run opioid clinic. While the clinic is open to anyone, Great Circle will offer some treatment options that are culturally-attuned to Native Americans. These include the ceremonial burning of sage (smudging), as well as art therapy which includes the making of dreamcatchers.

Ribbon-cutting opening was held March 2021 and is now open to the public Monday through Friday 7AM - 3:30PM and Saturday 7AM - 11AM.

Contact information: 503-983-9900 | 1-888-983-9866 | <https://www.greatcirclerecovery.org/>

Address: 1011 Commercial Street NE Suite 110 Salem, Oregon 97301

Low-Threshold Buprenorphine via Community Partnerships and Telemedicine—Case Reports of Expanding Access to Addiction Treatment During COVID-19

Levander, Ximena A. MD; Wheelock, Haven MPH; Pope, Justine MPH; Lee, Abby EMT; Hartmann, Kerith MPAS, PA-C; Abuelkhair, Sarah; Gregg, Jessica L. MD, PhD; Buchheit, Bradley M. MD, MS

[Author Information](#)

Journal of Addiction Medicine: February 19, 2021 - Volume Publish Ahead of Print - Issue -
doi: 10.1097/ADM.0000000000000811

Objectives

- Review **what** harm reduction is (and what it isn't)
- Discuss examples of **why** harm reduction matters & **how** it has been applied
- Consider the application of harm reduction in different settings
- Question, Answer, Discussion

Substance use may be directly related to the reason for clinical appointments or hospital admission - but substance use disorders are generally not addressed or treated

AND

Use of drugs or alcohol while in the hospital is not allowed

IMPACT

- Multidisciplinary care team
- Treats substance use disorders through medication, behavioral interventions, connections to peers
- Connects patients to ongoing care after discharge
- Has created a “sea change” in terms of how individuals with SUDs are treated at OHSU

What about patients who don't want treatment & struggle to stop using drugs or alcohol in the hospital?

Goal: Improve care for patients with substance use disorders, whether or not the patient wants to decrease or stop their use

Clinical and Hospital based interventions:

- Acknowledge drug and alcohol use in a non-stigmatizing way
- Prescribe methadone and buprenorphine immediately for those who want it, whether or not they plan to continue it
- Provide peers with no agenda other than support
- Care conferences: balancing patient goals, disease treatment goals, staff goals
- Provide naloxone on discharge and if patient leaves
- Provide safer use kits on discharge and if the patients leaves

Results?

Two-fold greater odds of receiving SUD treatment after discharge compared to similar patients who do not engage with IMPACT.

Interaction with IMPACT may also decrease mortality.

What about Residential Drug and Alcohol Treatment?

Use is not allowed

Individuals seek residential treatment largely **because** there is no use allowed

An individual's ongoing use may harm others in the environment

Harm reduction in residential drug and alcohol treatment: a work in progress

Rapid access to buprenorphine for any resident who needs it

Systems of care conference

No reactive discharges: what is the context, what are the needs, what are the resources

Frame struggles as treatment mismatch, not failure.

Warm hand-offs to next levels of care

Naloxone on discharge

Safer use kits

Summary

Harm reduction is an evidence-based set of practical strategies that save lives

Harm reduction can take several forms

Harm reduction can be, and should be, applied in all treatment settings
